Questions and Answers

1. For couples counseling, where they are tested together and it is a part of testing, are you looking for a totally separate proposal for just that segment?

Answer: Yes, couples counseling (Testing Together) would be proposed separate from HIV Testing. The CDC recognizes key differences between Individual Testing and Testing Together. They also have their own, separate, required training.

2. Can you talk a little bit more about Personalized Cognitive Counseling?

Answer: Personalized Cognitive Counseling is one of the CDC's EBI's, which is Effective Behavioral Intervention. It is a training that is provided for high-risk negatives and it is a one-session intervention and has a three-month and six-month follow-up. The link and the information that would give you some more detail on that is in the RFP (Section II.C.7, Page 9). In summary: high-risk negatives, one session, and three and six month follow-up.

3. What is the max budget for any of them, or is there a max budget that we can request?

Answer: There is not a maximum budget.

4. If you are applying, are you applying for each county? Can you apply separately for counties; can it be across the state?

Answer: You do not have to apply for services across the state. It can be statewide; or it can be one or two counties only.
